SUBJECT: Coronavirus: Preventative Disinfection Cleaning

Help Protect Your Team Against COVID-19.

Critical Facilities Solutions can help you protect against the spread of COVID-19 with cleaning and disinfecting services today.

Surfaces are cleaned utilizing Envirotek and/or Enviroclean and water prior to disinfection for dislodging surface particles. After surface particle removal is complete, disinfection process commences utilizing EPA-registered disinfectants.

Products with EPA-approved emerging viral pathogens claims are expected to be effective against COVID-19 based on data for harder to kill viruses.

Disinfection cleaning of frequently touched surfaces (for example: tables, doorknobs, light switches, handles, desks) with EPA-registered disinfectants that are appropriate for the surface. Fabric surfaces treated with disinfectant and clean extraction utilizing steam and vacuum recovery.
